

# Computer networks and PCs – installed, relocated, secured –

JasNET Consulting Inc. – (408) 257-3279 – email: [networks@jasnet.com](mailto:networks@jasnet.com)  
Network Consulting and Design Services

---

- Experienced professionals
- Fast response – able to meet tight deadlines
- Ongoing support available

## 1. Computer networks and PCs installed, relocated, secured

**Computer networks and PCs:** Whether you're moving from shared space to a new office, or just expanding your existing office network, we can design, install, and set up your computer network, servers, and PCs. Our designers carry industry-certified network design and network security credentials, so you have the assurance that the computer network that is designed for you will be robust and secure for your current and future needs.

**Wireless:** We also design and install wireless networks to allow your staff the freedom to move about your office with the knowledge that your notebook computers are authenticated and protected by today's industry security standards. It's convenient and requires no building alteration.

**Remote offices:** For remote users – both at home and in branch offices – we provide hardened and secure VPN (Virtual Private Network) access for your PCs.

**Minimal disruption:** We work with building management and interior design firms to ensure that tenant computer networks are properly wired and equipped for their business needs. We ensure that computer moves are completed with minimal disruption, on time and on budget.

## 2. Ongoing support available: PC support

Our support specialists have many years of experience working with end users. Credentials include Microsoft Certified Systems Engineer and experience with a variety of desktop software and hardware solutions.

We provide PC support by phone, pager, fax, email, and on-site visit for:

- Microsoft Office Suite (Outlook, Word, Excel, PowerPoint, Access)
- Microsoft FrontPage and Publisher
- Microsoft Internet Explorer / Netscape
- Adobe Acrobat PDF creation
- QuickBooks
- Scanning software
- Windows XP, 2000, 2003, NT, 98
- Networked copiers / faxes / printers
- PC migration from old to new

## 3. Round-the-clock, Critical infrastructure support

Our back-end, 24/7 server support group monitors your critical infrastructure – the network and servers – to ensure the proper functioning of your computing environment, including:

- Internet connection, firewall usage
- DSL and Network routers, switches
- Servers (Email, Web, SQL, file/print)
- Data backups for business continuity
- UPS / power failure
- Custom business applications

The server support group and your desktop support specialist work together as a team to provide you an extremely high degree of network and computer availability.
